

For Immediate Release: January 22, 2018

Sun Global Broadband LLC is announcing the completion of the Waikiki to Downtown "Super Long-range Mobile Wi-fi Network". SGB's seamless outdoor network coverage links Wi-Fi venues from Diamond Head through Waikiki, Ala Moana, Ward Villages and Town. This is the first of several phases for mobile Wi-Fi statewide coverage.

Sun Global Broadband's unique network design provides several unique technologies for Carrier Grade Mobile Wi-Fi. These include:

- Mobility up to 35 Miles Per Hour;**
- Minimal latency and signal delays;**
- High-availability for superior quality HD videos;**
- Efficient voice over Wi-Fi without cellular translation;**
- High-persistence, low-cost connections for Smart City Applications.**

Utilizing patented technologies from Altai Technologies, Casa Systems, Cisco Systems, and Enwa EyeVision, SGB innovation provides unique "hand-off" capabilities and continuous HD video capabilities not usually associated with Wi-Fi. SGB has agreements to seamlessly aggregate indoor Wi-Fi with major venues/businesses enabling expansion for island-wide and statewide coverage.

SGB and its partners in Japan, Asia and US have designed this network for "multi-country, single sign-on" capabilities for the international visitor industry. Specialized software, supporting multiple languages over a semi-private network, will provide travel and location based applications for cultural exchange between international travelers, Hawaii businesses, Japan 2020 Olympics, the Hawaiian community, and Asian/North American networks.

SGB is founded by businessman and entrepreneur and CEO/Chair Edward BT Sun (HP/Verifone). SGB's Management team includes Brook Emanuel (CFO / COO), Sharon Sun (Secretary & Treasurer), Keith Lee (General Counsel), Wayne Hirasa (Infrastructure Networks) & Frank Godek (Network Design). Technology Strategist Rick Ellinger and Marketing Strategist George Chalekian contribute to the international business team.

SGB's prominent international board includes:

- Dr. Sachio Semmoto (co-founder of KDDI Japan, eAccess, eMobile, and Chairman of Renova);**
- Dr. Fujio Matsuda (University of Hawaii President Emeritus, former Exec. Director for Research Corporation, and Hawaii Transportation Director);**
- Mr. John Warta (Founder of GST Comm, Electric Lightwave, NextNet., Pac. LightNet, & Cascade Divide),**
- and;**
- Mr. James Clark (International Investor).**

Board Advisors include:

- Mr. Robin Campaniano (First Hawaiian Bank Board & Former CEO for AIG Hawaii);**
- Thomas Yamachika (Hawaii Tax Foundation), and;**
- Dr. Raymond Leung (Chairman of TDK China, Founder of Ampere Technology Limited, Founder and Chairman of Altai Technologies Ltd).**
